STAINLESS GEAR CLAMPS

These European style clamps (originally manufactured in Sweden and sold in the marine market under the brand names ABA and AWAB) are now manufactured in America. They feature a non-perforated band with rolled edges that provides superior sealing and prevents hose damage. In addition, the fine pitch threads and riveted housing create a clamp with a very high sealing force. In marine and corrosive applications where safety and reliability are top considerations, these premium stainless clamps are an excellent choice.

Mini bolt clamps provide a sure seal on small diameter tubing and thin walled hoses. The clamp edges are rolled to prevent hose damage. These tiny clamps are made entirely with type 304 stainless material.

OILPAD... OIL ABSORBENT PADS

These oil cleanup pads measure 15" x 18" and are made from polypropylene. They reject water, and so are ideal for land and water use, and typically absorb 15 to 25 times their weight in spilled oil (up to 1.36 litres per pad).
