

# Commercial Products

# FAUCETS

We understand that every commercial project is different in scale, user needs, traffic patterns, code compliance and surrounding materials. That's why we provide a range of faucets that go through a thoughtful design process and incorporate innovations that improve the overall experience. Whether you are a designer, developer, installer, maintenance staff or end user, you can be assured our products will meet your needs. To help you find the right solution, we offer manual and touchless faucets, various power options, vandal-resistant aerators and a variety of flow rates.

# NEW TOUCHLESS FAUCETS WITH KINESIS™ TECHNOLOGY

KOHLER® touchless commercial faucets with Kinesis technology combine leading-edge designs with advanced sensor technology and commercial durability. The faucets carry over the design language from our residential faucet lines, allowing you to coordinate full collections in your projects. Kinesis technology conceals the sensor underneath the spout, giving you a clean aesthetic while delivering exceptionally accurate and reliable actuation in varying installation environments.

\*If tempered or premixed water is desired, order thermostatic mixing valve K-99799-NA. Up to 4 faucets can be installed per valve at 0.5 gpm. See Price Book for optional aerators available for faucets.

# TOUCHLESS FAUCETS WITH INSIGHT™ TECHNOLOGY

KOHLER® touchless faucets feature Insight technology, an adaptive infrared sensor that can analyze the surrounding area and calibrate the sensor to filter false triggers, thereby saving water. The faucets are powered by the KOHLER Hybrid energy system, featuring an energy cell that can provide maintenance-free power to the faucet for up to 30 years. And like all KOHLER commercial faucets, touchless faucets feature vandal-resistant aerators.

Branham™ wall-mount lavatory with shroud K-1999-1-0  
Geometric touchless faucet with Insight™ technology K-7516-CP

# LAVATORIES

Crafted with decades of experience, KOHLER® lavatories are engineered to provide years of lasting performance. The fired glaze on our porcelain forms a permanent finish which resists staining and scratching. This finish maintains its high gloss and allows for easy cleaning. The ultrathick enamel applied to our cast iron lavatories also resists staining, scratching and chipping while maintaining its lustrous sheen.

WAVE touchless urinal flushometer K-10675-SV-CP  
Bardon™ urinal with top spud K-4960-ET-0

# FLUSHOMETERS

The piston technology found in KOHLER® flushometers minimizes the water contact with chlorine-sensitive rubber components, increasing the longevity of the flush valve. The end result is reliable performance and lower maintenance, regardless of water conditions. Kohler's range of flush volumes means that you get a product that's right for every application and environment.

# TOUCHLESS FLUSHOMETERS

Kohler offers two unique types of touchless activation. WAVE technology offers hygienic on-command activation when the hand is waved directly over the flushometer. It eliminates random flushing that can be frightening to children—while also conserving water. Tripoint® technology senses the true distance of an object, is not affected by changes in light, reflection or distant movement and delivers precise performance. The KOHLER Hybrid energy system, which combines low-energy draw with high-energy storage, powers flushometers delivering 30 years of power.\*

WAVE touchless toilet flushometer K-10673-SV-CP

Kingston™ Ultra wall-hung elongated toilet bowl with top spud K-84325-0

Stronghold® elongated open-front toilet seat K-4731-SC-0

# COMMERCIAL TOILETS & TOILET SEATS

Kohler is an established leader in commercial toilet bowls, but we keep innovating. Designed to flush from 1.1 to 1.6 gpf, our Ultra bowls have set a new standard for flushing performance. Our robust design tolerates the variety of water supply conditions found on remodel and new construction sites. Our toilet bowls pair seamlessly with our seats for a winning combination of durability and performance. Another improvement is Kohler's antimicrobial finish that's applied to select commercial fixtures. It inhibits the growth of stains and odors, and the EPA-registered material is baked right on to the finish, providing a smooth and safe surface.

Tend™ wall-mount urinal K-20713-ET-0

# URINALS

We offer the right urinal for every commercial application. Sizes range from small footprint to full stall in washdown, siphon-jet and blowout flushing action. All of our urinals are precision-engineered to deliver maximum cleaning action at every flush interval from waterless all the way up to 1.0 gpf. Our patented back-wall design minimizes splash-back for a better user experience while smoothly contoured, fire-glazed surfaces are easy to keep clean.

# INSTITUTIONAL & INDUSTRIAL SHOWERING

Kohler is committed to helping you provide safety and convenience in the washroom. To do that, we design and manufacture showering products and accessories that are durable, simple to maintain and come with easy-to-replace pieces. We also offer a range of other institutional accessibility and serviceability products ranging from foot controls to cleansing sprays.
