Cold Supply Line Tag

The model number is printed on a tag that is attached to the cold water supply line of the faucet. The supply line is located below the sink, countertop, bath rim, or behind the bowl of a bidet. The model number, or part number, is typically preceded by "P/N." In the image above, the model number is 6227-V3-AA. Types of Cold Supply Lines

Flexible Supply Hoses

Copper Supply

Depending on the type of faucet, the supply line coming from the underside of the faucet may be a copper tube or a flexible hose. The supply line should have a tag attached to it with "COLD" printed on one side. The other side of the tag will contain the faucet model number.
